Hi,

The provisions of the plan are overreach and overly restrictive in relation to impervious surfaces.

We object to WH. R5 and the area of 1000m<sup>2</sup>. It should be much larger.

We object to existing impervious areas being included.

We object to WH R6 and the area being so small. If anything it should be over 5000m<sup>2</sup>

These rules are overly restrictive to development and totally unnecessary in such a high rainfall climate. Impervious surfaces help high volumes of rainfall runoff move quickly to streams and reduce inundation contributing to land slips.

I do not consent to my personal details being published publicly.

Isla
